GFI MailArchiver For Exchange Free [Updated-2022]

The benefit of organizing your email in an Exchange mailbox is that your mail server is the ideal place for storing all corporate emails. However, as time passes, the mailbox becomes increasingly large and this will eventually begin to have a detrimental impact on the performance of the mail server. To avoid this, you can archive your email into one compact location, saving disk space and helping to eliminate Outlook. GFI MailArchiver for Exchange includes a variety of features and can be used to archive all your email. However, if you just want to archive a single user's email, you need not need to go to all the trouble. There are two main options that can be used for this task: · Remotely back up the user's mailbox using Microsoft Exchange • Supports the main versions of Microsoft Exchange available: 2003, 2007 and 2010. · Download the agent on the user's computer and remotely backup the user's mailbox using GFI MailArchiver. This download will allow you to connect to the user's Exchange mailbox, perform a backup and restore operation and transfer the backed up information back to the user's mailbox. As part of the service, GFI MailArchiver agent comes bundled as an application that needs to be run by every user on every PC. This application will synchronize local archives on a PC with the archive on the user's mail server and then delete the local archive. · Set up email retention and categorization policies Setting up an email retention policy is critical and while email archiving is essential, retaining emails for an indefinite time is costly! With GFI MailArchiver you can create rules to delete one or more emails after a specific time, for example, you can delete all emails sent by the Marketing Department that are older than 7 years. In addition, GFI MailArchiver can help you to categorize emails by adding a label to the emails that meet a particular condition. For example, emails sent from the CEO, could be automatically labelled with [CEO]. · Helps comply with Sarbanes-Oxley Act By archiving all

company email, GFI MailArchiver helps organizations to meet regulatory compliance such as the Sarbanes-Oxley Act. Under the Sarbanes-Oxley Act 2002 and Security and Exchange Commission (SEC) rules, public companies must prove that their internal controls and audit trails are sound and that their processes are capable of producing certifiably correct data. Companies must retain all correspondence created, sent 09e8f5149f
