SAP Systems AB is a business systems company that delivers software for managing, integrating and processing business data and operational activities for over 50 million users in more than 100 countries. We deliver industry leading systems and services to support customers' core processes and business strategy in the areas of finance, human resources, marketing, manufacturing and customer service. Our systems are built on the most productive, flexible and intelligent technologies and services on the market. In addition to our award-winning core systems, we have a unique position in several global technology markets. We combine industry-leading technology and services to deliver business solutions that drive success for our customers. Our vision is to make every customer's business more productive, flexible and intelligent. We strive to put customers at the center of what we do, by helping them to adapt our innovative technology and services to their needs. Our global network of 400,000 employees is dedicated to achieving this vision. We are growing our people, our customer business, and our financial flexibility with one of the most robust financing programs in the industry. We're also expanding our geographic presence and committing to international markets. We believe that our customers, products and people are what make us successful, and are investing in the future of our business. Whether you shop online or visit your local store, we are committed to serving your needs. It's about helping you to achieve your business goals, whether you're one of our customers or a visitor.

Proxmox management interface

What Proxmox is a virtualization administration and management product intended to be used with a network of physical servers, as well as virtual machines running in other hypervisors. Proxmox offers a number of features designed to make it easier to administer and manage a VPS or a physical cluster of servers. The architecture of the Proxmox software consists of an interface layer (the management interface) and a service layer (the core services). Proxmox consists of a number of products that are available as ready-made products. There are also third-party tools for working with Proxmox, called integrators. Proxmox supports the following hypervisors and software, or combinations thereof: VMWare ESXi, VMWare ESXi Server, Oracle VM VirtualBox, VMWare ESX Server, Hyper-V Server, FreeBSD Jail, KVM, OpenIndiana, Xen, Debian-based KVM, OpenVZ. Proxmox can
