KEYMACRO is a free keyboard macro recorder that lets you record keyboard shortcuts and mouse clicks for later

playback. Keyboard macros are handy for you to automate repetitive tasks in your computer. For example, you can create a macro for opening a web page by simply clicking the right button of your mouse, and the "OK" or "Cancel" button will automatically be clicked for you, too. KEYMACRO is an easy to use tool that lets you record, save, edit, and play back keyboard shortcuts, mouse clicks and mouse movements. It includes many built-in macros for common tasks in your Windows. When creating a macro, all the information about the keystrokes and mouse movements are stored in the form of a text file that is saved in the same directory where the program is installed. The file name will be similar to "Window_1.key". You can use "Edit Window" to modify the text file or convert the macros from the other formats. The program also supports ExactSize to fix the pixel width of the text. Once you have created a macro, you can play it back with the "Play Macro" option in the "Menu" menu. The settings of the playback are very easy to change. You can also print the result of the playback. Main features include: * Macro Recorder (keyboard shortcuts or mouse clicks) * Enable macro recording on startup * Macro file type:.txt or.mxt * Save the clipboard to a macro file * "Edit Window" to modify the text and convert other file
